

# Manual Testing Overview:

Test the functionality of the application.

**Links:**

## Test Criteria:

- Ensure all files are properly set up and the server is running.
  - Ensure CSS functionality
- Test 'See All Bots' button to ensure proper functionality.
- Test 'Draw' button to ensure proper functionality.
  - Test all robot card 'Add To Duo' buttons to ensure proper functionality.
  - Test all robot card 'Remove From Duo' buttons to ensure proper functionality.
  - Ensure no more or less than two robot cards allowed per match
- Test 'Duel' button to ensure proper functionality.
  - Ensure wins and losses are allocated to the correct array
- Test 'Play Again' button to ensure proper functionality.

## Test-1 See All Bots button test :

1. At the Home page, click the 'See All Bots' button.
2. Receive All Bots in the Bots array.

## Bug-report Test-1:

Steps to receive bug:

1. At the Home page, click the 'See All Bots' button.
2. Receive All Bots in the Bots array.

Expected result:

- See All bots with CSS styling in the array

Actual result:

- Reference Error: botsArr is not defined
- Status 400

## Test-2 Wins and Losses:

Steps to receive bug:

1. Click 'Draw' button
2. Choose 2 Bots out of the array
3. Click 'Duel' Button

Expected result:

- If match is won, increase the number of wins by 1
- If match is lost, increase the number of losses by 1

Actual result:

- All matches, win or loss, are allocated to the loss array
